

Acquérir les premiers outils mathématiques

LA CONSTRUCTION DU NOMBRE - CYCLE 1

La fleur du nombre

Compétences visées / Attendus de fin de cycle :

Construire le nombre pour exprimer des quantités:

- Mobiliser des symboles analogiques, verbaux ou écrits pour communiquer des informations orales et écrites sur une quantité jusqu'à 10 au moins.
- Avoir compris que le cardinal ne change pas si on modifie la disposition spatiale ou la nature des éléments.

Stabiliser la connaissance des petits nombres:

- Réaliser une collection dont le cardinal est compris entre 1 et 10.
- Utiliser le dénombrement pour comparer deux quantités ou pour réaliser une collection de quantité égale à la collection proposée.
- Quantifier des collections jusqu'à dix au moins ; les composer et les décomposer par manipulation effective puis mentale.
- Parler des nombres à l'aide de leur décomposition.

Construire des premiers savoirs et savoir-faire avec rigueur:

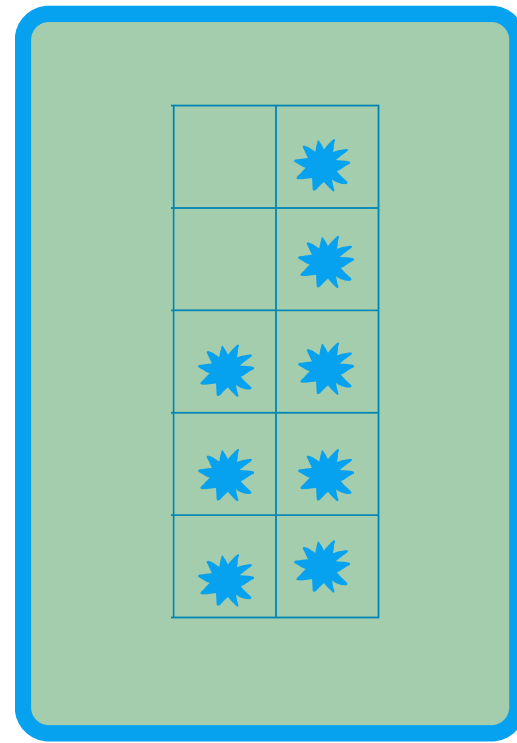

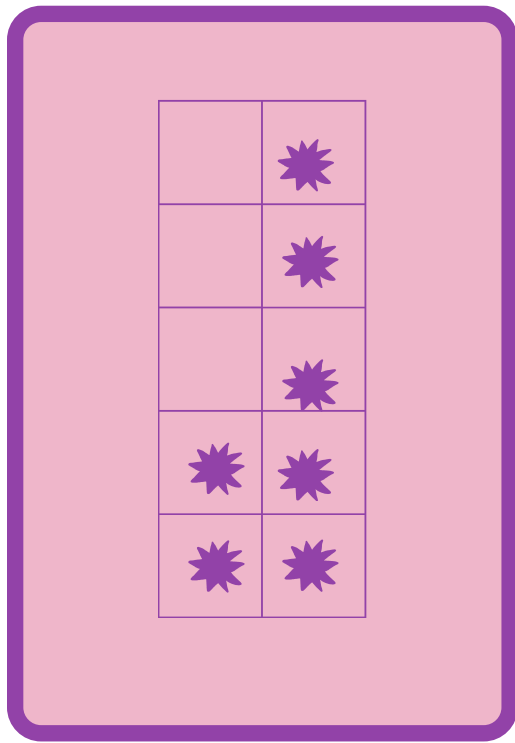

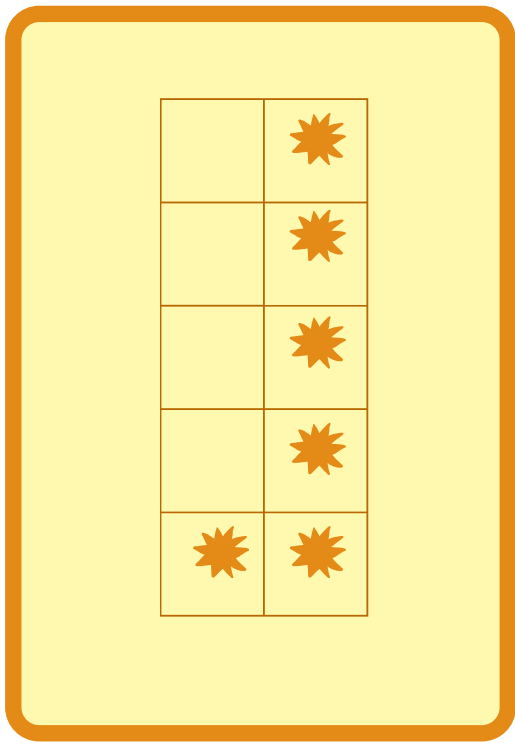

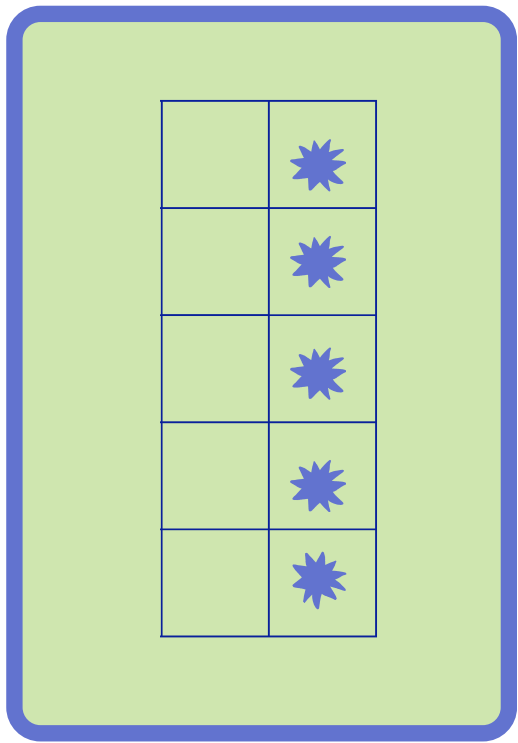

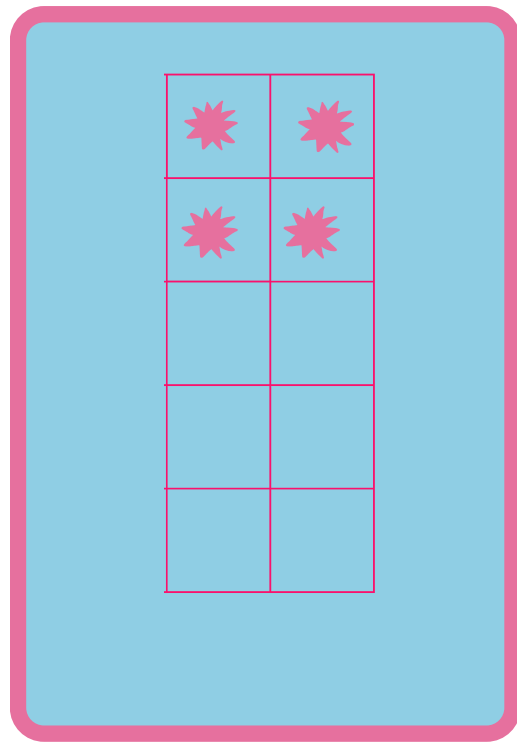

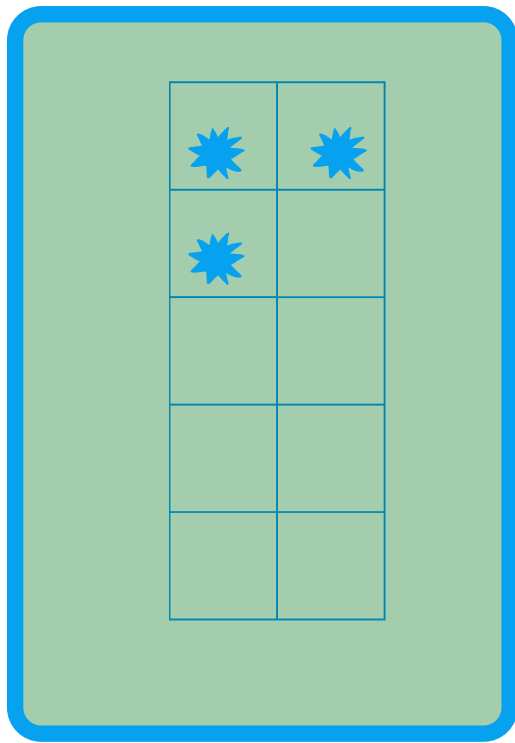

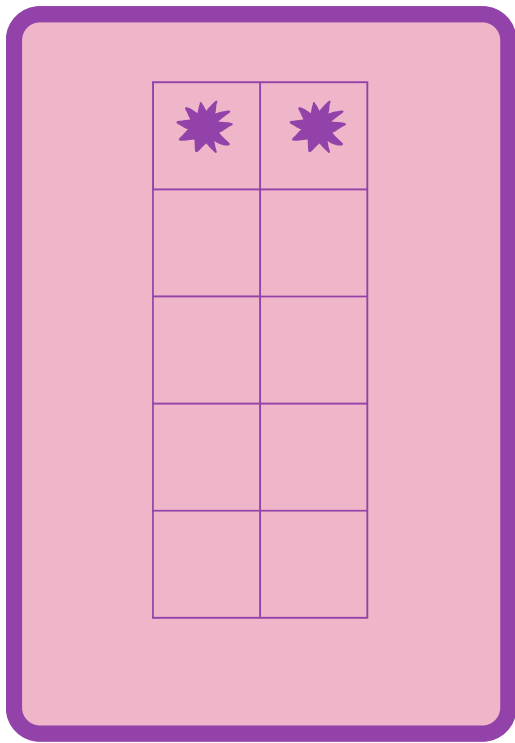

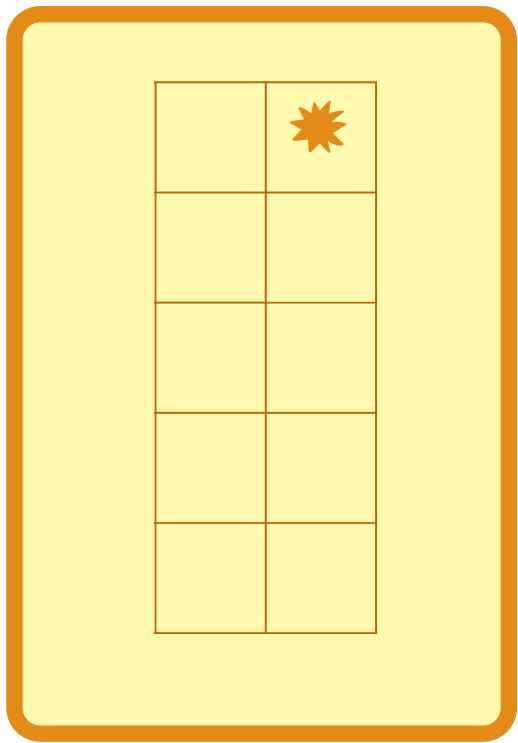

- Lire les nombres écrits en chiffres jusqu'à dix.

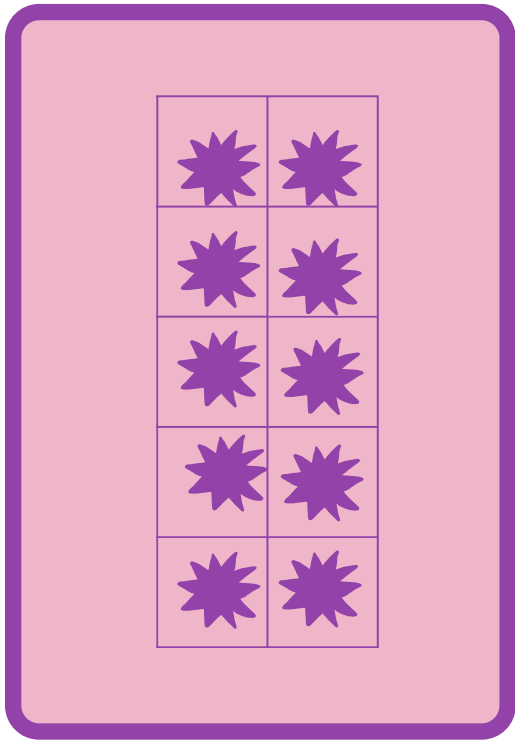

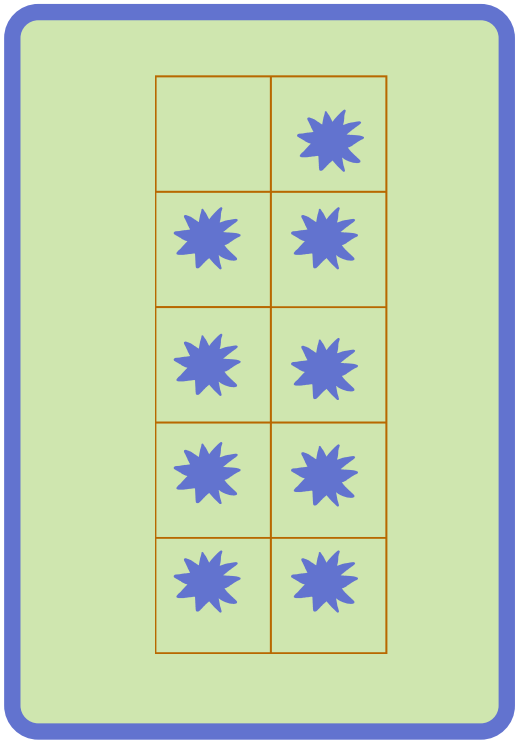

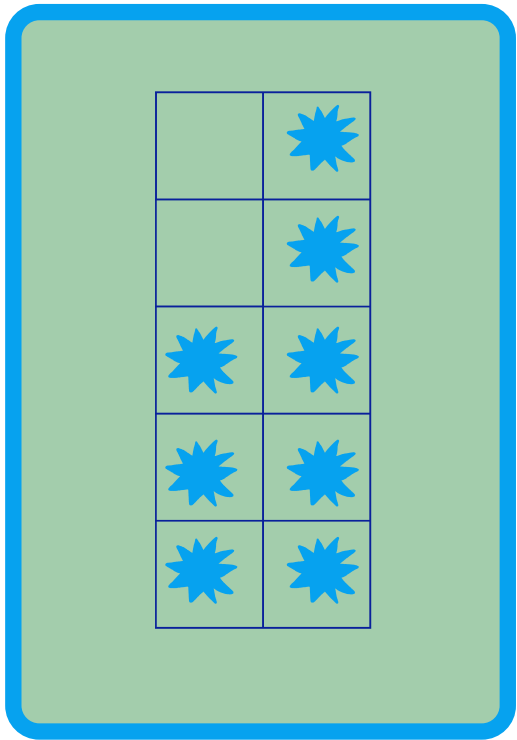

Objectifs :

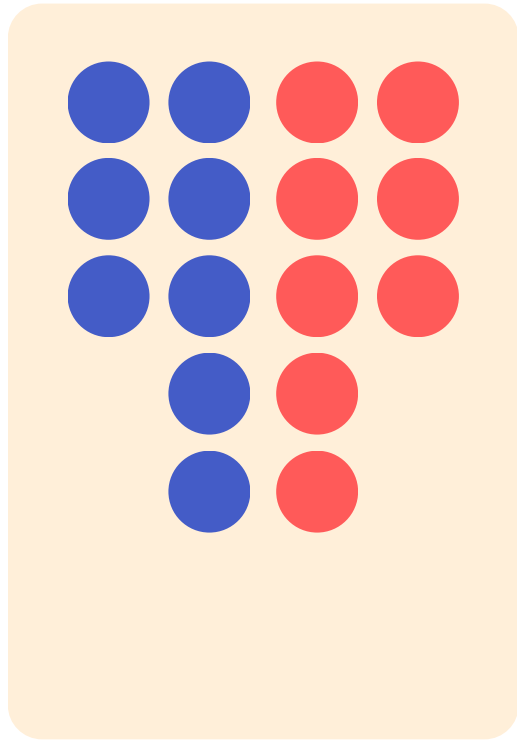

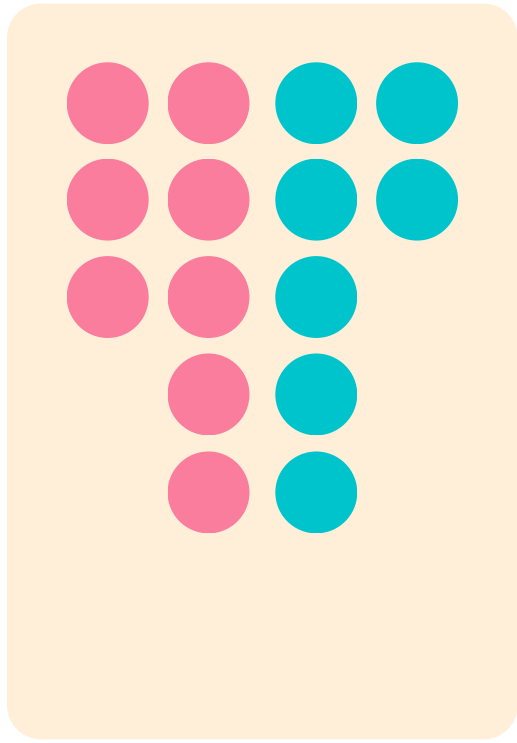

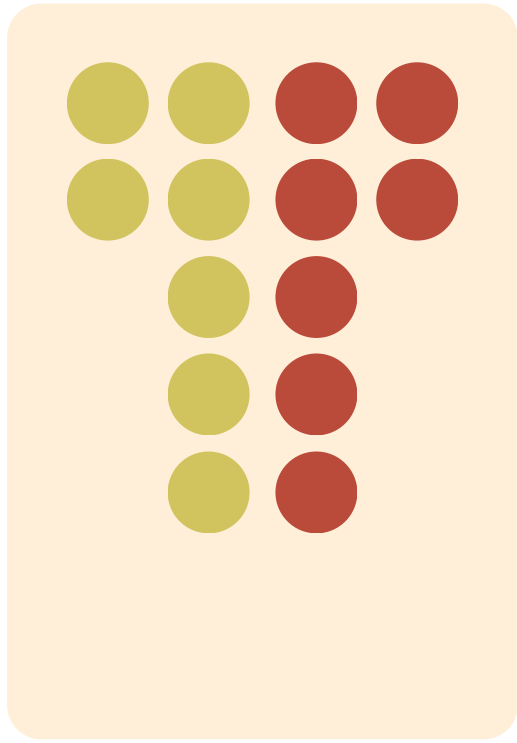

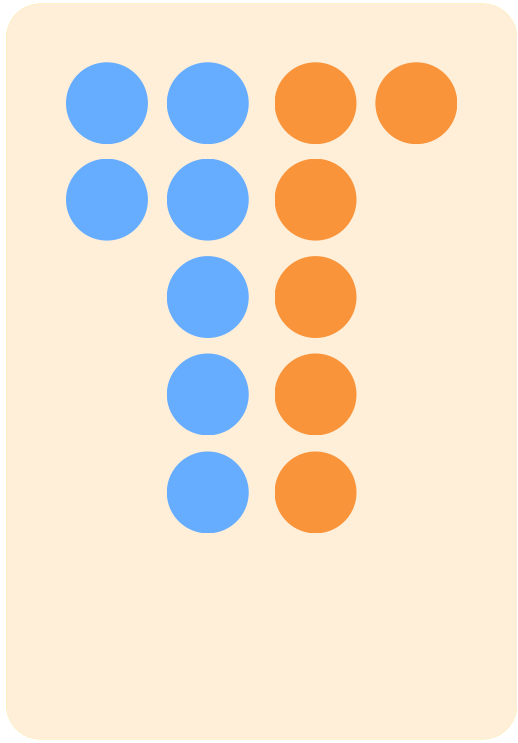

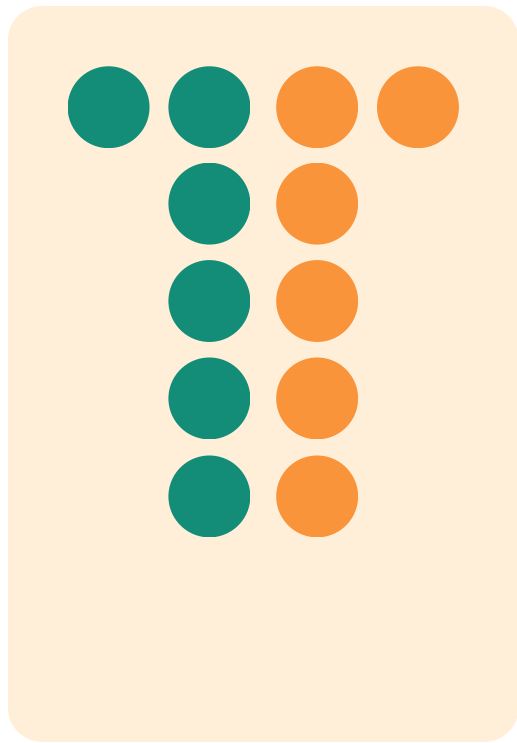

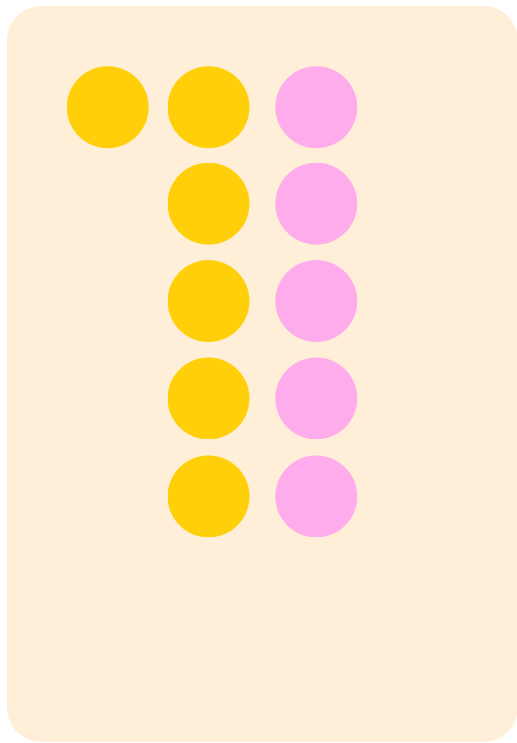

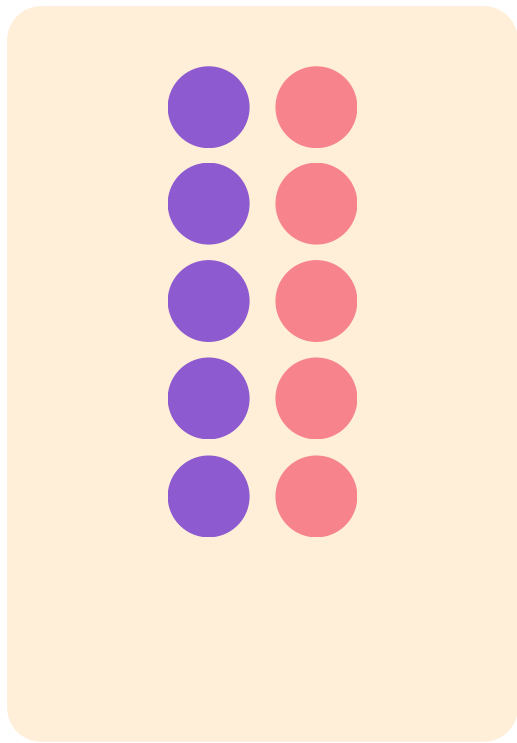

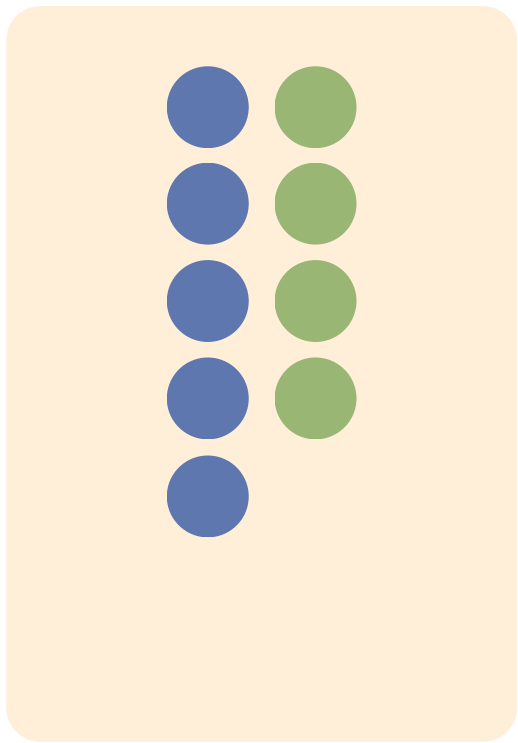

Manipuler les différentes écritures, représentations du nombre, décomposer / recomposer les nombres.

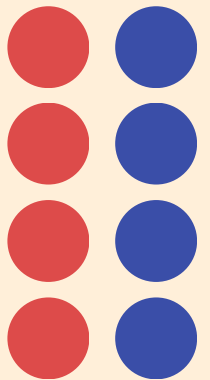

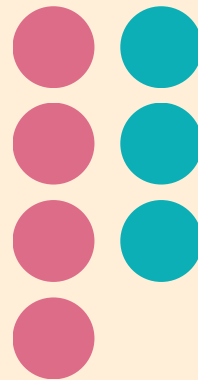

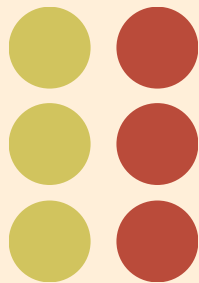

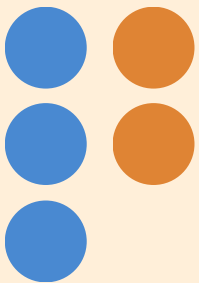

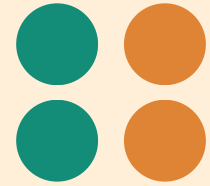

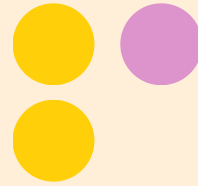

Consigne :

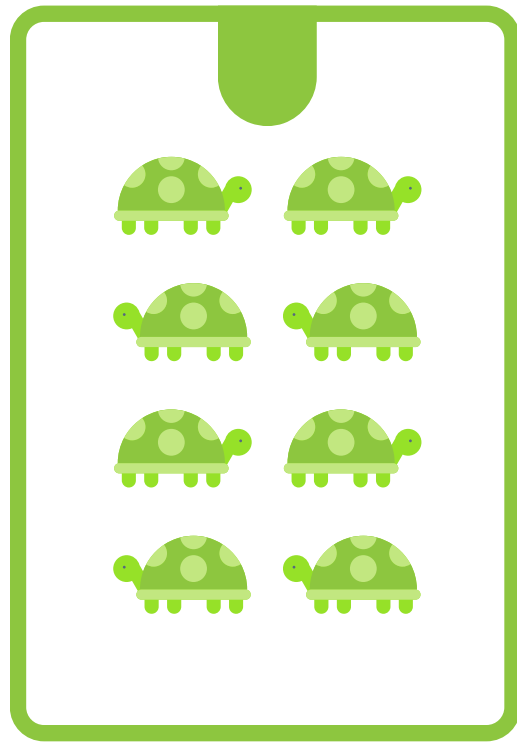

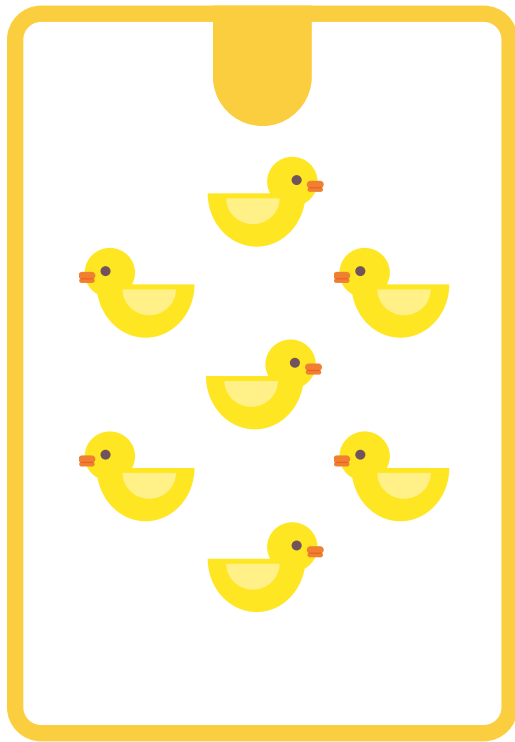

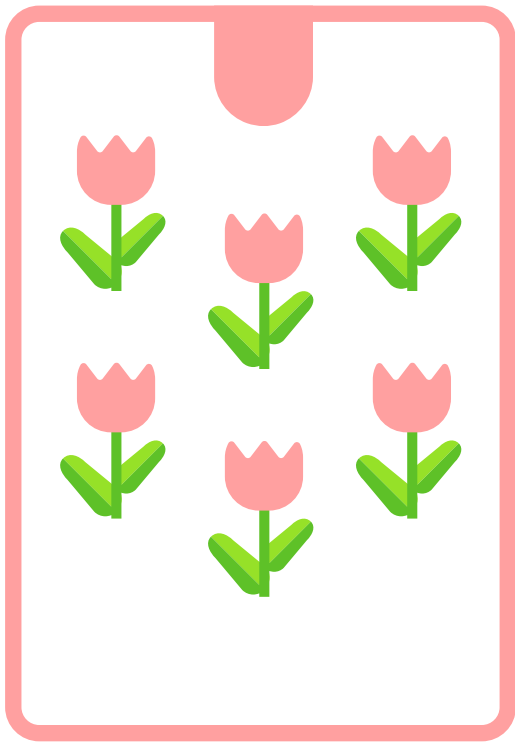

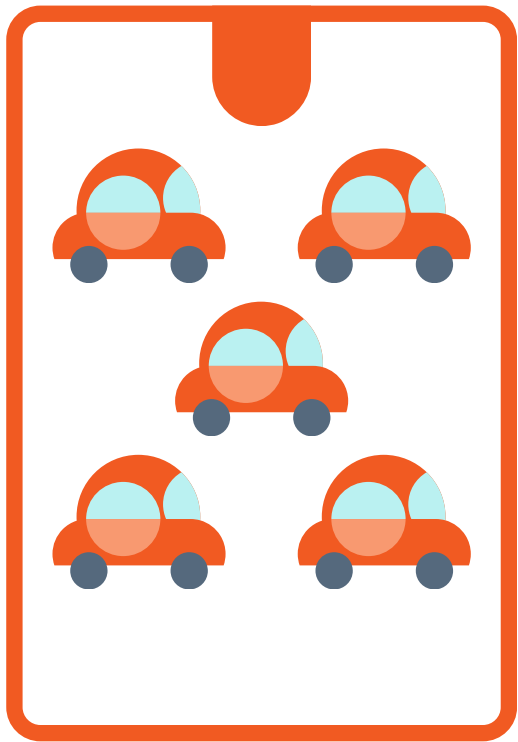

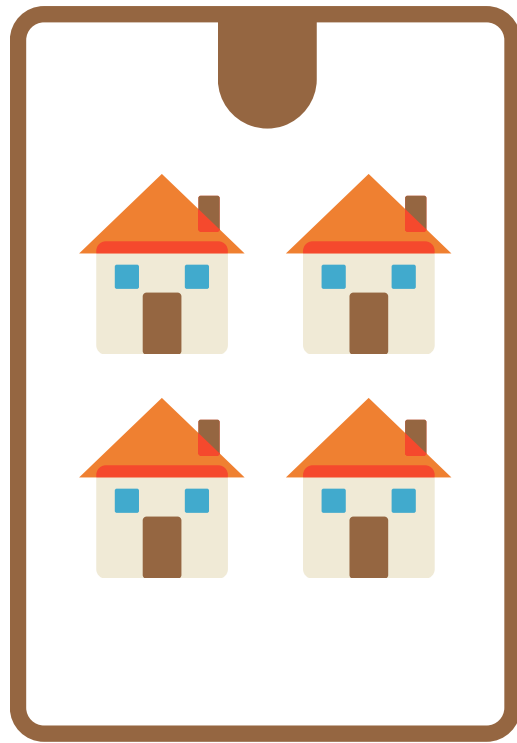

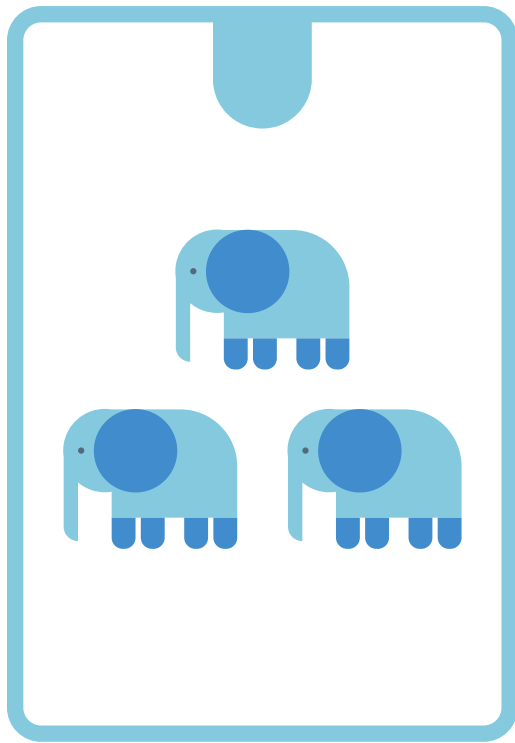

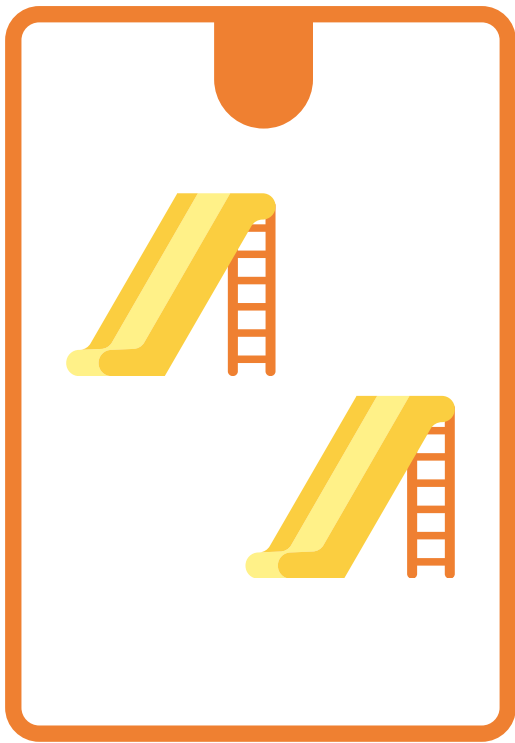

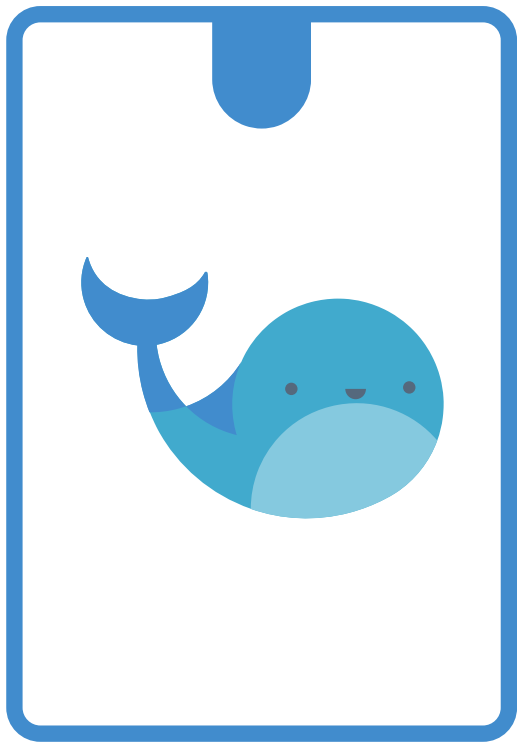

Lire la représentation du nombre au centre de la fleur puis compléter chaque pétale avec la quantité, la décomposition, la constellation identique.
